

NORWOOD K-SERIES HOT STAMP PRINTERS

The K-Series imprints scannable UPC codes, lot numbers, prices, expiration dates and more onto a variety of materials including flexible films, labels and more and integrates seamlessly into packaging lines for form fill seal, blister pack, converting, thermoforming, cartoning and various custom packaging applications. The K-Series can be used in-line with packaging and conveying equipment or off-line for manual or semi-automatic operations — making it one of the industry's most versatile hot stamp imprinters.

KEY FEATURES

- **Two models:** K-15 features a 2" x 2" imprint area and the K-15SP print area measures 3/4" x 1-1/4"
- **Creates accurate marks** including lot numbers, prices, expiration dates, and more
- **Variety of substrates** including rigid, semi-rigid materials, flexible films, and labels
- **Integrates seamlessly** into packaging lines for form fill seal, blister pack, converting, thermoforming, and cartoning
- **Washdown capabilities** for advantages in sanitary food and pharmaceutical environments
- **Smooth, reliable quiet cam-action**, pneumatically powered
